# DISCLAIMER

**EBOOK DISTRIBUTION** is a guide that outlines the requirements for successful distribution of an eBook. It has information applicable to Kenyan authors but is also ideal for authors around the world.

Information on service providers is current and shows their terms, conditions and offerings as at the publishing of this guide. Always refer to the individual service provider's website for more information.

This guide portrays an objective view of the services by different eBook retailers and distributors. Experience and research guide the recommendation I give of various services. *WordPower Publishing Kenya* is not affiliated to nor does it represent any service provider mentioned.

Before engaging a service provider, familiarize yourself with their guidelines and read reviews on the internet about the experience other users have with their services. The decision to use a particular service lies with the author.

Have your eBook files ready as you learn about the eBook distribution process. I have provided a checklist for the required files to make sure you have the correct ones.

# INTRODUCTION

After preparing your eBook for publishing, are you wondering how you will distribute it and which channels are the best to use?

There are many eBook retailers and distributors and you want to know which one is safe to use. If you are a Christian author, you want to know which Christian sites you can use to sell your eBook.

The money questions never fail to show up...do I pay upfront to distribute my eBook? What percentage of royalties do I get? Who pays the highest royalties?

Ebook publishing is new terrain for Kenyan authors. The concerns are many and the answers are scarce.

*WordPower Publishing Kenya* has blazed the trail for you and offers guidance along these uncharted waters.

*EBOOK DISTRIBUTION* will answer your eBook distribution questions so you can sell your eBook and begin your journey towards being a published author. With an eBook, you can build your author platform and share your God-given message with the world.

# FILES CHECKLIST

The best way to ensure you have all your files is to use a checklist. The checklist is to check you have all the correct files to upload to eBook retailers e.g. Amazon Kindle, Kobo, iTunes, Barnes & Noble or aggregators like Draft2Digital, Smashwords or Ingram Spark.

Your files need to be in the international formats accepted by most eBook distributors. These are *ePub, Mobi,* and *MS Word (.docx)*.

**Epub |** It is the most common format for eBook distribution globally. The version currently accepted by most distributors is *ePub 2.* You can validate your *ePub* file with *validator.idpf.org* to confirm it is error free.

**Mobi |** The full name is Mobipocket. It is an eBook file format used mainly by Amazon Kindle. You can check your *Mobi* file on the Kindle previewer. It is a free desktop application available for Windows 7 or Intel Mac OSX 10.9 or later.

**MS Word |** This is the word processor for *Microsoft Windows.* Distributors prefer you upload a *.doc or .docx* file which they convert to *ePub* and *Mobi* using their online converters. Format it according to the style or publishing guide of the individual distributor. Most of the formatting requirements are similar across the board.

*Distributors use the PDF file format for print books.*

# METADATA

Metadata is data that provides information on your eBook. It is important to have it ready when you want to upload your eBook to your preferred distributor.

Metadata helps those who search for your eBook or topic to find it on search engine results pages. It is a unique identity for your eBook.

It includes:

> Book title
> Book subtitle
> Author name
> Categories
> Keywords
> ISBN
> Book description
> Author biography
> Publisher's name
> Publication date
> Book price (in USD & KSH)

Before uploading your eBook, have the above information ready in one document for ease of access.

# ACCOUNT BIODATA

Besides your eBook's metadata, distributors require additional information for administering your account. It is good to have it ready before you open an account. The following is what you will require to open accounts with most eBook retailers and distributors:

**Full names.** These are the official names you use in your legal documents. They can differ from your author name(s), especially where you use a pen name.

**Email address.** It is for official communication. Your Gmail will suffice.

**Phone number.** It is for instances where retailers use double authentication for your account.

**Bank Account details.** Includes: bank name, branch, swift code, currency and account number. Some retailers like Kobo will allow you to put your local bank account details but require the currency to be in USD. Amazon pays Kenyan authors via cheque only. Most of the other retailers pay via bank account, PayPal or Payoneer.

**PayPal email address.** Where a retailer offers the option of payment via PayPal, you will need to provide your PayPal email address. To receive your funds fast from PayPal, connect it to your M-Pesa account on the *PayPal-mobile money* site.

**KRA PIN.** You will undergo a tax interview with all eBook distributors in the US as the IRS requires they file a tax report for income earned on their platforms. The interview is a series of questions you answer and they populate the information (plus your KRA PIN) in a form called *W-8BEN.*

*\* Email and phone number confirmations are necessary. Keep this in mind when delegating account opening to a third party.*

# DISTRIBUTORS

There are many eBook retailers and distributors at your disposal. Select the one that best meets your needs. Most don't charge a setup fee. The main ones are:

**Amazon Kindle |** They publish eBooks via *Kindle Direct Publishing (KDP).*
**Kobo |** They publish eBooks through their *Kobo Writing Life* platform.
**ITunes |** It is run by *Apple* and you prepare your eBook on *iBooks Author* available on MAC computers. Not on *Apple?* Use aggregators.
**Barnes & Noble |** They publish eBooks and print books through the Barnes & Noble Press.
**Draft2Digital |** D2D is an aggregator that distributes your eBook to most retailers. It is easy-to-use and a good one for new authors.
**Smashwords |** This is an aggregator. Follow their style guide so they don't reject your file.
**Ingram Spark |** This is an aggregator that distributes your eBook and print book to retailers, libraries and bookstores worldwide. They charge a fee of $25 to upload eBooks and $49 for print books (or both).
**Christian eBook distributors |** They are few and most only accept eBooks from major Christian traditional publishers, not self-publishers. Ebooks from most Christian authors are available on the main eBook retailers. Distributors and advertisers include: *Faithlife Ebooks, Christianbook.com, Gospel eBooks* among others.

In Kenya, publishers mainly sell eBooks on their websites. The independent eBook store that works with different publishers is *eKitabu*. To reach a global market, go for the international retailers.

# DISTRIBUTOR CHOICE

The reasons for choosing an eBook distributor will centre on whether you want to publish to multiple stores or just one. Here are three points to help you with your decision.

> As a new author who wants to publish their book in many eBook stores, it is advisable to use an aggregator. That way you don't have to open and manage multiple accounts. An aggregator distributes your eBook and gives you sales reports in one place. They pay you for the royalties collected from the different stores. This simplifies the selling of your eBook and you can focus on marketing it. They take an additional 10% of your royalties. Considering the headache they take out of distributing your eBook, I would say "go for it!"

> If you want to publish in one store, I would recommend Amazon or Kobo. Most readers worldwide buy eBooks from these stores. You can ask your friends and colleagues where they buy eBooks from. These two will most likely come up tops. As a Kenyan author, you will receive a cheque from Amazon for sales and Kobo will require a bank account in USD.

> If you distribute your book with Amazon Kindle and later change your mind and want to do it through an aggregator or vice versa, this will not be possible – for a long time. Aggregators have disclaimers warning you about violations of Amazon's terms and conditions you may not know about. Decide beforehand whether you want to publish directly with Amazon Kindle or you will use an aggregator to get there.

# PRICING

A challenging step in eBook distribution is pricing. The best way to select a price is to check out the price of eBooks in your category. The price range of most eBooks by self-published authors is $2.99 (Ksh. 300) and $9.99 (Ksh. 300).There are some important points to note about pricing.

> Ebook prices should be the same across the board. If you price your eBook lower in one retailer, it might cause you trouble with another.
> Amazon will lower your eBook price if they can find it at a lower price on another site.
> You can first check out the royalty amount you will receive per eBook sold before publishing your price. This will let you know what a fair price will be for your book.
> With expanded distribution, there are price variations. Where a retailer expands distribution of your eBook to other markets, the royalties are much lower – even as low as $0.25 (Ksh. 25). To mitigate this, some distributors sell your eBook at the price you stated in most stores and at a higher price in some territories. This information is available on the page where you will price your book.
> You will receive your royalty amount in Kenya shillings and this involves an exchange rate. Factor this in when pricing your eBook.
> The average royalty amount is 70% of the retail price of your eBook. Where you use an aggregator, they deduct an additional 10% making your royalty amount 60%.
> You can opt to set up your eBook for pre-order. You can load your eBook and cover or cover alone and market it as a pre-order. This notifies your readers you have an upcoming book and they can order for it now and receive it when you launch it.

*The Ksh. amount is an estimate.*

# LINKS

As you distribute your eBook, keep in mind you will need links to your website or Social Media profiles. You can include these in your author bio or where applicable as you upload your eBook.

Get a list of all the links you will need to help you promote your eBook.

**Bitly** offers you a facility to shorten your links. Do you want to share the different links to your eBook on Social Media but find they are too long? Use Bitly to shorten them and easily share them with your audience.

**Linktree** offers you a service to list your links to your website or eBook sales pages on your Instagram account, which has room for only one link on the profile. You can check out the Linktrees of other authors.

Draft2Digital offers a **Universal Book Link (UBL)** to help you market your eBook. It shows the different stores where your eBook is on sale.

# HELPFUL RESOURCES

To help you along the journey of distributing your eBook, there are helpful resources on the internet from self-published authors. You can follow their blogs or download any guides they have and learn from them.

A good website with lots of self-publishing advice is **Just Publishing Advice.**

If you have a blog, you can prepare an article to launch your eBook.

Prepare short posts for your Social Media profiles and gather hashtags (#).

You can create an author bio on **Amazon's Author Central** site so you can have all your eBooks on your Amazon Kindle profile.

Always remember to read reviews of the different service providers you intend to use. You will learn the pros & cons of each service and make an informed decision.

After you distribute your eBook, it is time to market it on all your online platforms. You can look at how other authors are marketing their books on Social Media to get ideas.

# ABOUT THE AUTHOR

**Josephine Ngatia** is an Author & Christian Writer from Nairobi, Kenya. She is the founder of WordPower Publishing Kenya. She is good with long form writing and specializes in White Papers, Special Reports, How-to Guides and blog posts.

Josephine is a self-published author of three eBooks: *Maiden Book: How to Plan, Outline and Write Your First Book*, *Demystifying The Grey Kingdom* and *Life Purpose: A Beginner's Guide.* They are available in eBook stores and libraries worldwide.

Contact Josephine to help you identify writing projects for your business or create digital information products for your content marketing strategy.

She writes blog articles and posts Special Reports on her personal blog: *TheUrbanChristian.co.ke* and her publishing website: *www.wordpowerpublishing.co.ke*

You can reach her on *josephine@wordpowerpublishing.co.ke* or *+254 722970194*
